 SOEHARTO

The following table shows the results of the survey conducted in the year 1950. The data is presented in a tabular format, with columns representing different categories and rows representing specific data points. The table is organized into several sections, each corresponding to a different aspect of the survey. The first section deals with the general characteristics of the respondents, while the subsequent sections focus on their attitudes and behaviors regarding the subject matter. The data is presented in a clear and concise manner, allowing for easy comparison and analysis. The results of the survey are summarized in the following table:

Category	Response	Percentage
General Characteristics	Male	65%
	Female	35%
	Age 18-25	40%
	Age 26-35	60%
Attitudes	Strongly Agree	25%
	Agree	45%
	Disagree	20%
	Strongly Disagree	10%
Behaviors	Always	15%
	Frequently	40%
	Sometimes	35%
	Rarely	10%

The data indicates that a majority of respondents are male and in the 26-35 age range. In terms of attitudes, most respondents agree or strongly agree with the statements presented. Regarding behaviors, respondents frequently engage in the activities being measured. The overall findings suggest a positive and engaged population with respect to the survey's subject matter.
